

Guidelines for taking photos in preparation for the installation of your charging point

1. A photo of the main circuit breaker on the meter of the grid operator (main switch)

2. The main distribution box where we need to depart from and the space around it clearly visible

3. The main distribution box in detail from which we have to depart with the door open (fuses readable)

4. Route from distribution box to the charging point (multiple photos possible)
